## General Information

### Product Description

ACRYLITE® Resist ZK-P polymer is an amorphous, impact-modified thermoplastic molding and extrusion compound based on polymethyl methacrylate (PMMA).

Typical properties of ACRYLITE® Resist acrylic polymers are:

- high weather resistance
- high light transmission
- improved resistance to stress cracking
- good melt flow rate
- easy to color

The special properties of ACRYLITE® Resist ZK-P polymer are:

- medium impact/break resistance and strength
- medium melt flow rate
- high heat resistance
- AMECA listed
- FDA food contact use
- BPA free

Application:

Used for injection molded parts.
